MUSIC ON HOLD FOR ALL PHONES

To make music on hold work for MULTIPLE HT878 phones in your office, purchase the Skutch AS702 Music On Hold Adapter. ONE adapter will make the HOLD button on ALL of your HT878 phones activate music on hold. The AS702 is NOT a MUSIC PLAYER, but provides a jack for plugging in a music player.

AS702 MUSIC ON HOLD ADAPTER \$199

HT878 PHONE SYSTEM AND MUSIC ON HOLD ADAPTER SETUP

THERE ARE THREE PARTS TO YOUR SYSTEM:

Your HT878 2-Line Business Phone

This is a simple 2-line phone that is sure to work with music on hold as shown here.

Your AS-702 Music On Hold Adapter

The adapter is the “interface” that provides a place to plug music into your phone. It also detects the “hold” state of the call and plays the music.

Your Music Source (On Hold Player)

A reliable music on hold player will keep your message playing 24/7. Callers will hear the message “in progress.” More than a boom box or iPod, a professional player has a monitor speaker, metal case, a multi-year warranty and is free from worries associated with battery operated players. If power to the player is lost, your music on hold message will come back on automatically.
